ANAS BUTT

London, Ontario | 647-761-2790 | anasahmadbutt@gmail.com

EDUCATION

York University   **Toronto, Ontario**
BSc Computer Science   *2019*
- *Vice President,* Humanity First Canada. <u>*Relevant Coursework:*</u> Advanced OOP, Advanced Data Structures & Algorithms, Database Systems, Operating System Fundamentals, Software Design, & User Interfaces

TECHNICAL SKILLS

Languages/Frameworks (proficient): JavaScript, Python, React, Django, Firebase, SQL, Java

WORK EXPERIENCE

Tata Consultancy Services   **Toronto, Ontario**
QA Analyst   *April 5, 2021 - Present*
- Review programming code for errors and resolve 100+ bugs prior to code deployment.
- Analyze business requirements and user experience goals to develop test plans and test cases for proprietary software development.
- Collaborate with project managers and customer service team to address software issues, resulting in a higher than 90% customer satisfaction rating.
- Execute functional and manual testing using technologies such as HP ALM and Perfecto
- Develop and execute Automated Test Scripts with Selenium Web Driver using Test NG, Maven, Cucumber and Java in Eclipse.

Flynn Group of Companies   **Mississauga, Ontario**
Junior Applications Support/Developer   *April 2020 - April 2021*
- Maintained and supported the organization's standards and infrastructure, using Microsoft .NET Framework, SQL, and integrated system components.
- Trained Project Managers & Supervisors with new updates through presentations and technical documentation.
- Developed a scheduling software to help Project Managers allocate resources efficiently using VB.NET, Microsoft Forms, and SQL.
- Ported over a desktop application to mobile using Flutter & Firebase. The application showed live data from the desktop application that helped users stay updated on the go.
- Worked independently to perform routine SQL database maintenance, including updating queries for increased efficiency and performance.

AMJ Canada Inc.   **Vaughan, Ontario**
Junior Developer   *May 2019 - April 2020*
- Implemented testing on software to uncover bugs and troubleshoot critical issues before application launches.
- Maintained a database of over 35,000 members; took user requests and optimized queries increasing efficiency by 20-30%.
- Created Python scripts to automate and ease repetitive daily tasks for members of the team. This reduced time spent by 30 minutes daily.
- Drafted a 700-page technical documentation for existing software that would be used in assisting expansion.

LEADERSHIP & ADDITIONAL ACTIVITIES

Community Leader in Etobicoke   2019 – 2021
- Hold community events & gatherings such as community clean up, food drives, blood drives, and picnics.
- Assist the elderly with moving, and recently in covid with groceries through proper social distancing measures.
